FIG. 6

The graph displays the light quantity difference of light image pattern (%) on the y-axis against the element address on the x-axis. The y-axis scale ranges from -7.0 to 5.2, with major grid lines every 1.0 unit and minor grid lines every 0.2 units. The x-axis scale ranges from 0 to 3840, with major grid lines every 960 units and minor grid lines every 240 units. The plotted line shows a complex pattern of fluctuations, with notable peaks around element addresses 1920 and 2880, and a significant dip around element address 3840.
